The Dissemination Strategy

The project partnership has defined a shared Dissemination Strategy with the aim of making the deliverable produced and the results achieved by the MathE project accessible to the highest number of potential beneficiaries.

The process carried out involved various phases:

1.) Identification of the dissemination objectives.

The main identified dissemination objectives are:

- Inform the potential users about the project deliverables, make the project deliverables accessible and usable to the potential users that is: Math Lecturers, Math Students at university level and Policy makers in the field of education
- Public bodies responsible for Educational policies
- Enhance the visibility of the project
- Maximise the impact of the project in the short, medium and long term

2) Definition of the contents for dissemination.

The identified contents of the project to be disseminated are:

- The MathE project portal and all the deliverables addressed to Math Lecturers, Math Students at university level
- The Student's Assessment Toolkit, the Online Math Library of Video Lessons and Teaching Materials and the Community of Practice that were produced as Intellectual Outputs
- Methodological and management strategies for the achievement of the project objectives
- Results achieved at both transnational and local level which highlight the level of convergence between the results reached and the objectives originally foreseen.
- Unforeseen results that are considered points of strength

3) Identification of dissemination actions

In addition to the contractual obligations, each project partner had to carry out at least 1 dissemination activity during each month of the project. These actions were registered by the partner on the specific form which was published on project website.

Project Number: 2018-1-PT01-KA203-047361

The full list and related information of the dissemination activities carried out can be easily consulted at <https://mathe.pixel-online.org/MNG-diss.php>.

The Dissemination section was also important for best practices sharing as all partners are able to access the information about the dissemination events organized by the others and draw ideas from them. The project's partners had the possibility to learn from each other in order to improve their dissemination strategies.

4) Identification of the target groups of the dissemination activities.

These groups were identified and can be sub-divided into the following categories:

- Math Lecturers
- Math Students at university level
- Policy Makers in the Field of Education

5) Production of relevant tools for the dissemination

In order to ensure a homogeneous and consistent communication of the project, Istituto Politecnico Do Braganca (PT) as Project Applicant and Pixel (IT), in cooperation with some selected partners created:

- A visual identity for the project, i.e. a project logo published on each page of the Internet project website, Portal, each article (both on paper and on-line), as well as on each document produced (brochures; posters; press communication etc.).
- Communication material for speeches and presentations on the project, to be used by all partners during conferences; meetings; events in the relevant field. These include: power point project presentations; project brochures translated in all partners' languages, etc.
- A Dissemination form which was completed by each partner in the project. The Dissemination form is available for download from the project website (see Download section: <https://mathe.pixel-online.org/MNG-download.php>). Each partner completed several Dissemination forms describing in detail the dissemination activities completed (e.g. Participation in a conference in which the project was presented; sending of brochures; articles; organization of events etc.).
- A Dissemination section on the project's web site. This section, accessible to all, contains a grid collecting all dissemination activities carried out by both the project's promoter and partners. Please see "Dissemination" section on the project web site at: <https://mathe.pixel-online.org/MNG-diss.php>.

6) Identification of the actions to be put into act for the dissemination.

Project Number: 2018-1-PT01-KA203-047361

The identified actions for dissemination were:

- Continual updates on the MathE website with information on the development of the activities and the results in progress.
- Creation and distribution of brochures and posters containing information on the project activities and the results achieved.
- Creation of a Facebook page (<https://www.facebook.com/MathE-343525106233888/>)
- Contacts with the press, the radio and the television with the aim of informing them of the projects, the activities, and on the results achieved
- Participation of the applicant or the project partners in conferences, meetings and trade fairs in the educational sector.
- Organization of formal and informal meetings with potential beneficiaries of the projects results. This may include: participation in other projects meetings where this project can be presented; organization of ad hoc meetings to present the project to a group of potential beneficiaries; organization of one to one meetings with public authorities and politicians involved in the field of education, etc.
- Organisation of Multiplier Events

Information on the specific dissemination activities carried out by each partner can be found under the specific link on the project web site at: <https://mathe.pixel-online.org/MNG-diss.php>

7) Evaluation

For each dissemination activity, an evaluation of the number of subjects reached in the target group framework was done. This can be found on the dissemination form completed by each partner regarding each dissemination event carried out. The finished forms are available on the project web site at <https://mathe.pixel-online.org/MNG-diss.php>

Project Number: 2018-1-PT01-KA203-047361

Management of the Dissemination Activity

All the MathE project partners were required to complete at least an average of 1 dissemination activity every month. Then they had to collect and present the information about them.

For this purpose, Pixel has created an on-line Dissemination Form to assemble and describe in details the dissemination activities.

NAME OF THE PERSON INVOLVED IN THE EVENT	
<input type="text"/>	
DATE OF THE EVENT	
from: <input type="text"/>	to: <input type="text"/>

OUTCOMES AND RESULTS (follow-up actions to be taken etc.)	
<input type="text"/>	

Project Number: 2018-1-PT01-KA203-047361

The Dissemination Form provides the following information about each dissemination event carried out by each partner: date and place of the event, type of the event (e.g. mailing, conference, meeting, informal contact etc), a description of the event, the target group of the event, number of participants in the event, the results of the specific dissemination activity carried out (e.g. further requests of material, request of project portal password, joining of the project etc.)

All partners completed a form for each dissemination event that takes place.

The project partners then upload on the project web site all the completed dissemination forms together with the activity reports on a tri-monthly basis. They can be found in the 'Dissemination' section of the MathE portal (<https://mathe.pixel-online.org/MNG-diss.php>).

In this way, the project partners can see the dissemination activities concluded by all project partners and can be inspired to carry out their own events.

The screenshot shows the MathE project website navigation menu. The 'Dissemination' link is highlighted with a red box. A callout bubble points to this link with the text 'Dissemination section on the project web site'.

Contents of the Dissemination Activity

Every project partner carried out a number of dissemination activities in order to make the project in-progress available for a wider audience.

The specific contents which were disseminated, by the project partnership, at European level are:

- The MathE Project portal and all the resources and information it contains
- The MathE Intellectual Outputs
- Innovative aspects of the project.
- Relevance of the project at European level and the added value the European partnership provides for the project.
- Information about the project objectives, activities and in progress and expected results.
- Information about the Erasmus+ Programme and about the opportunities provided at European level for educational purposes.
- Methodological and management strategies for the achievement of the project objectives
- Results achieved at both transnational and local level which highlight the level of convergence between the results reached and the objectives originally expected.
- Unanticipated results that are considered points of strength.

Timing

The dissemination activity started from the first month of the project and continued throughout the project period.

Project Number: 2018-1-PT01-KA203-047361

Target group coverage

The target groups for the dissemination activities were:

- **Association** (2 events organized in Bulgaria, 1 event organized in France, 1 events organized in Ireland, 17 events organized in Italy, 5 events organized in Lithuania, 2 events organized in Portugal, 9 events organized in Romania)
- **Enterprises** (1 event organized in Belgium, 1 event organized in Bulgaria, 1 event organized in Ireland, 4 events organized in Italy, 1 event organized in Lithuania, 5 events organized in Portugal)
- **Experts** (3 events organized in Bulgaria, 1 event organized in France, 1 event organized in Germany, 1 event organized in Greece, 1 event organized in Iran, Islamic Republic of, 6 events organized in Ireland, 16 events organized in Italy, 10 events organized in Lithuania, 13 events organized in Portugal, 19 events organized in Romania)
- **General Public** (9 events organized in Ireland, 2 events organized in Italy, 4 events organized in Lithuania, 8 events organized in Portugal, 4 events organized in Romania)
- **Public Bodies** (1 event organized in Bulgaria, 1 event organized in France, 1 event organized in Ireland, 14 events organized in Italy, 6 events organized in Lithuania, 1 event organized in Poland, 3 events organized in Portugal, 2 events organized in Romania)
- **Researchers** (1 event organized in Austria, 1 event organized in Brazil, 1 event organized in Bulgaria, 1 event organized in Finland, 2 events organized in France, 1 event organized in Germany, 3 events organized in Greece, 1 event organized in Iran, Islamic Republic of, 21 events organized in Ireland, 23 events organized in Italy, 17 events organized in Lithuania, 1 event organized in Malta, 19 events organized in Portugal, 23 events organized in Romania)
- **Schools** (1 event organized in Austria, 2 events organized in Belgium, 6 events organized in Bulgaria, 1 event organized in Estonia, 1 event organized in Finland, 1 event organized in France, 1 event organized in Germany, 1 event organized in Greece, 4 events organized in Ireland, 38 events organized in Italy, 16 events organized in Lithuania, 1 event organized in Poland, 9 events organized in Portugal, 13 events organized in Romania)
- **Students** (1 event organized in Brazil, 1 event organized in Bulgaria, 1 event organized in Germany, 1 event organized in Greece, 1 event organized in Iran, Islamic Republic of, 16 events organized in Ireland, 13 events organized in Italy, 8 events organized in Lithuania, 18 events organized in Portugal, 19 events organized in Romania)

Project Number: 2018-1-PT01-KA203-047361

- **Teachers** (1 event organized in Austria, 2 events organized in Belgium, 1 event organized in Brazil, 3 events organized in Bulgaria, 1 event organized in Estonia, 2 events organized in Finland, 2 events organized in France, 3 events organized in Germany, 2 events organized in Greece, 19 events organized in Ireland, 36 events organized in Italy, 24 events organized in Lithuania, 1 event organized in Malta, 1 event organized in Poland, 30 events organized in Portugal, 47 events organized in Romania)
- **Training Agencies** (1 event organized in Austria, 3 events organized in Bulgaria, 1 event organized in Cyprus, 1 event organized in Estonia, 1 event organized in Finland, 1 event organized in France, 1 event organized in Germany, 2 events organized in Greece, 1 event organized in Ireland, 19 events organized in Italy, 5 events organized in Lithuania, 1 event organized in Norway, 1 event organized in Poland, 3 events organized in Portugal, 6 events organized in Romania)
- **Universities** (1 event organized in Austria, 2 events organized in Belgium, 4 events organized in Bulgaria, 1 event organized in Cyprus, 1 event organized in Estonia, 2 events organized in Finland, 1 event organized in France, 1 event organized in Germany, 4 events organized in Greece, 16 events organized in Ireland, 37 events organized in Italy, 19 events organized in Lithuania, 1 event organized in Malta, 1 event organized in Norway, 2 events organized in Poland, 11 events organized in Portugal, 11 events organized in Romania)

Geographical Coverage

The project partnership organised 336 dissemination events.

A total number of 2 dissemination events were organized in Austria. They were: Training Seminar, Transnational Meetings.

A total number of 2 dissemination events were organized in Belgium. They were: Transnational Meetings.

A total number of 1 dissemination events were organized in Brazil. It was: Conference or Fair.

A total number of 8 dissemination events were organized in Bulgaria. They were: Training Seminar, Transnational Meetings.

A total number of 1 dissemination events were organized in Cyprus. It was: Transnational Meeting.

A total number of 1 dissemination events were organized in Estonia. It was: Transnational Meeting.

A total number of 3 dissemination events were organized in Finland. They were: Transnational Meetings.

Project Number: 2018-1-PT01-KA203-047361

A total number of 3 dissemination events were organized in France. They were: Transnational Meetings, Other.

A total number of 3 dissemination events were organized in Germany. They were: Transnational Meetings.

A total number of 5 dissemination events were organized in Greece. They were: Transnational Meetings.

A total number of 1 dissemination events were organized in Iran, Islamic Republic of. It was: Transnational Meeting.

A total number of 33 dissemination events were organized in Ireland. They were: Conference or Fair, National Meeting, Article on website, Training Seminar, Transnational Meetings, Other, Informative Mailing.

A total number of 79 dissemination events were organized in Italy. They were: Conference or Fair, National Meeting, Training Seminar, Transnational Meetings, Other, Informative Mailing.

A total number of 35 dissemination events were organized in Lithuania. They were: Conference or Fair, National Meeting, Article on website, Training Seminar, Transnational Meetings, Other, Informative Mailing.

A total number of 1 dissemination events were organized in Malta. It was: Conference or Fair.

A total number of 1 dissemination events were organized in Norway. It was: Transnational Meeting.

A total number of 2 dissemination events were organized in Poland. They were: Transnational Meetings.

A total number of 37 dissemination events were organized in Portugal. They were: Conference or Fair, National Meeting, Newsletters, Training Seminar, Transnational Meetings.

A total number of 54 dissemination events were organized in Romania. They were: Conference or Fair, National Meeting, Article on website, Training Seminar, Transnational Meetings, Other, Informative Mailing.

A total number of 2 dissemination events were organized in Russian Federation. They were: Conference or Fair, Transnational Meetings.

A total number of 1 dissemination events were organized in Slovenia. It was: Transnational Meeting.

A total number of 11 dissemination events were organized in Spain. They were: Conference or Fair, Training Seminar, Transnational Meetings.

A total number of 1 dissemination events were organized in Switzerland. It was: Transnational Meetings.

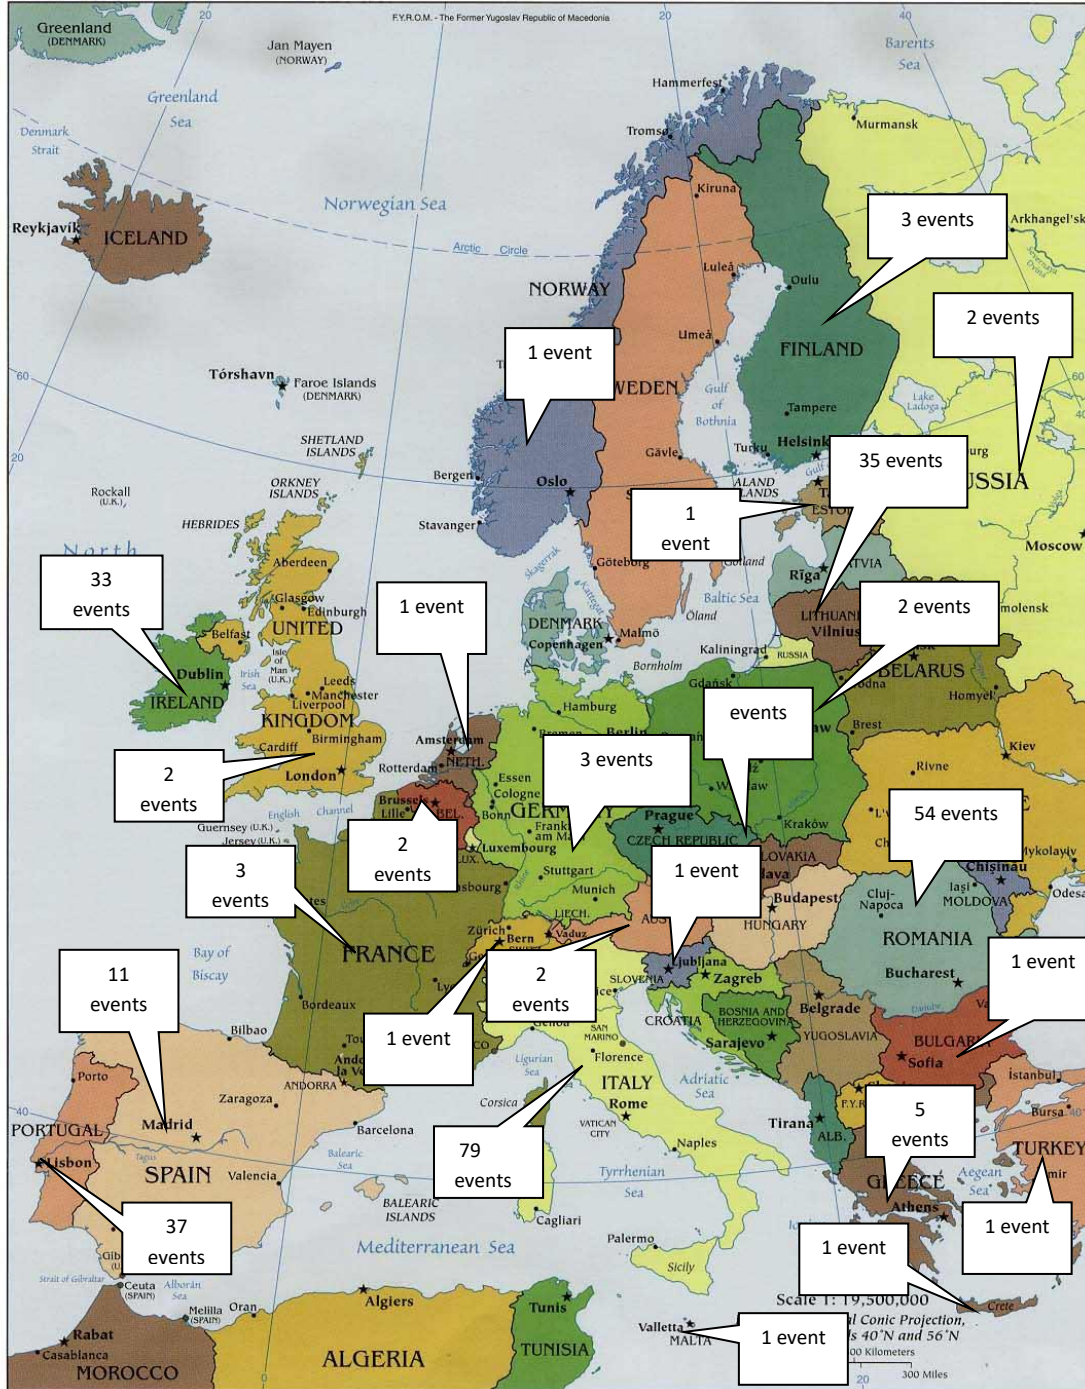

A total number of 1 dissemination events were organized in The Netherlands. It was: Transnational Meeting.

A total number of 1 dissemination events were organized in Turkey. It was: Transnational Meeting.

A total number of 2 dissemination events were organized in United Kingdom. They were: Conference or Fair, Transnational Meeting.

A total number of 45 dissemination events were organized in Online. They were: Conference or Fair, Article on website, Training Seminar, Transnational Meetings, Other.

Dissemination Activities Carried Out

The following is a list of dissemination activities and tools used by the project partners:

■ *Conferences and Fairs*

Partner	Activity description	Date of the event	Target Groups	Country	Number of people
Pixel	Elisabetta Delle Donne, in the framework of the online international conference the Future of Education gave a speech presenting some of the European projects where Pixel is currently involved. The MathE project was fully presented focusing on the activities and expected results.	01.07.2021	Enterprises, Researchers, Training Agencies, Teachers, Universities	Italy	30
Kauno technologijos universitetas	Good practice seminar for Math lecturers was organized. On the 1st of June, 2021, a video conference "Mathe – project for you and your students" - good practice seminar was organized by lecturers who were directly involved into MathE project activities and it was a good chance to spread information for different staff. Presentation was made by Lina Dindienė about MathE project with support of discussion of other lecturers involved into project.	01.06.2021	Teachers, Universities	Lithuania	72
Pixel	During the 10th edition of the New Perspectives in Science Education international conference, held online on 18-19/03/2021, Elisabetta Delle Donne presented the MathE project describing the project aims and activities.	18.03.2021	Public Bodies, Training Agencies, Schools, Universities	Italy	179
Instituto Politécnico de Bragança	Online lecture about inclusion in the teaching of Mathematics.	20.11.2020	Researchers, Students, Teachers	Brazil	50
Instituto Politécnico de Bragança	Presentation of the outcomes of a fellowship programme for young researchers with the presence of the Minister of Science and Higher-Education.	13.11.2020	Researchers, Students, Teachers, Universities	Portugal	50
Instituto Politécnico de Bragança	Conference for high-school and higher-education teachers where experiences and case-studies were shared and discussed.	05.11.2020	Schools, Teachers	Portugal	65
Kauno technologijos universitetas	ERASMUS 2.0 virtual training. The virtual training co-organised by ECIU and YERUN took place online on the 4 and 5 November 2020. The aim of the event was to prepare practitioners to take full advantage of the next programme and be fully prepared for some of the key initiatives the EC plans to introduce from January onward. Participants worked in groups, therefore it was a good chance to share the experience in Erasmus+ projects where we take place. MathE project as a project with innovation in online training and testing was presented to group of participants.	05.11.2020	Public Bodies, Researchers, Universities	Lithuania	10

Project Number: 2018-1-PT01-KA203-047361

Partner	Activity description	Date of the event	Target Groups	Country	Number of people
Fundatia EuroEd	Parsifal Multiplier Event. During the event, held in Suceava (RO) on October 2020, MathE project was informal disseminated.	20.10.2020	Researchers, Schools, Teachers, Experts, Association	Romania	20
Fundatia EuroEd	Event with teachers. During the teachers seminar, held in Iasi (RO) on September 2020, Elza Gheorghiu presented MathE brochure. The project's aims and results were fully explained and it was examined if there was the possibility of further collaboration.	08.09.2020	Researchers, Teachers, Experts, Association	Romania	20
Fundatia EuroEd	Parsifal Multiplier Event. During the event, held in Suceava (RO) on July 2020, MathE project was informal disseminated.	26.07.2020	Researchers, Training Agencies, Schools, Teachers, Experts	Romania	16
Kauno technologijos universitetas	Conference about motivation in the study process was organized in KTU Santaka Valley. Project was presented and the leaflets shared.	22.06.2020	Researchers, Teachers, Universities	Lithuania	40
Instituto Politécnico de Bragança	International conference about new trends and prospects for the future of education.	18.06.2020	Researchers, Teachers, Universities		50
Pixel	During the 10th edition of The Future of Education international conference, held online on 18-19/06/2020, Elisabetta Delle Donne presented the MathE project describing the project aims and activities.	18.06.2020	Public Bodies, Researchers, Schools, Universities, Association	Italy	130
Fundatia EuroEd	Virtual presentation of article "IMPROVING STUDENTS' KNOWLEDGE IN MATHEMATICS WITH THE MATHE PROJECT'S DIGITAL TOOLS" at the eLse International Conference.	30.04.2020	General Public, Public Bodies, Researchers, Training Agencies, Schools, Teachers, Experts, Universities, Association		30
Instituto Politécnico de Bragança	The purpose of the International Conference on Operations Research and Enterprise Systems (ICORES) is to bring together researchers, engineers, faculty, and practitioners interested in both theoretical advances and practical applications in the field of operations research.	22.02.2020	Researchers, Teachers, Universities	Malta	1000

	of education for development and also to discuss educational practices in higher education.				
Instituto Politécnico de Bragança	The Polytechnic Institute of Bragança (IPB) organizes numerous events, with the aim of making the institution known to the general public and to publicize its training offer. Opening its doors to the community, IPB facilitates contact with the reality of higher education, offering diverse activities from demonstrations, visits to laboratories and experimental activities.	30.04.2019	General Public, Students, Teachers	Portugal	250
Limerick Institute of Technology	Schools Science Fair	30.04.2019	Students, Teachers	Ireland	500
Kauno technologijos universitetas	Event in Birštonas Public Library regarding to the establishment of new science and technologies area. During the event Kaunas University of Technology Faculty of Informatics was presented in as a cooperating institution. The project „MathE“ was presented to the participants.	23.04.2019	General Public, Researchers, Schools, Teachers, Experts, Universities	Lithuania	20
Fundatia EuroEd	International Conference - New Perspectives in Science Education. Presentation at the International Conference New Perspectives in Science Education of the article "MathE – A different approach to learn".	21.03.2019	Schools, Teachers, Experts	Italy	
Pixel	During the eight edition of the New Perspectives in Science Education international conference, held in Florence (IT), on 21/03/2019, some brochures of the MATHE project were distributed to the conference participants. Elisabetta Delle Donne had the opportunity to talk about the project aims and activities and some of the participants asked to be kept informed.	21.03.2019	Public Bodies, Researchers, Schools, Universities, Association	Italy	188
Limerick Institute of Technology	Careers Fair	14.03.2019	Students, Teachers	Ireland	250
Limerick Institute of Technology	RDS Science Blast	07.03.2019	Researchers	Ireland	10
Instituto Politécnico de Bragança	Conference about educational strategies and technological approaches to education, involving approximately 80 researchers and university teachers.	02.03.2019	Researchers, Teachers, Universities	United Kingdom	80
Instituto Politécnico de Bragança	The congress aims to provide participants with a space for debate on policies, practices and research in Higher Education, with particular focus on the evaluation issue.	07.02.2019	Researchers, Students, Teachers, Universities	Portugal	500
Fundatia EuroEd	Online registration for the International Conference New Perspectives in Science Education of the article "MathE – A different approach to learn".	21.01.2019	Researchers, Schools, Teachers, Universities		
Instituto Politécnico de Bragança	National meeting of school's science clubs that gathered high-school teachers and researchers from all areas of knowledge to present the outcomes of their collaboration and to discuss possible partnerships.	18.01.2019	Researchers, Teachers, Experts	Portugal	60

Project Number: 2018-1-PT01-KA203-047361

Partner	Activity description	Date of the event	Target Groups	Country	Number of people
Kauno technologijos universitetas	During the final conference dedicated to the project HealthEDU we started disseminating other future European projects among them MATHE project.	21.11.2018	Schools, Teachers, Experts	Lithuania	40
Pixel	During the 11th edition of the Innovation in Language Learning international conference, held in Florence (IT), on 08/11/2018, some brochures of the name of the Mathe project were distributed to the conference participants. Elisabetta Delle Donne had the opportunity to talk about the project aims and activities and some of the participants asked to be kept informed.	08.11.2018	Enterprises, General Public, Public Bodies, Researchers, Training Agencies, Schools, Students, Teachers, Experts, Universities, Association	Italy	165
Kauno technologijos universitetas	During the final conference (multiplier event) of HealthEDU project that was dedicated to teachers, administration staff, primary schools, also parents of small children who are going to kindergartens, primary schools, we had the possibility to start talking about MATHE project, its objectives and expected results. Moreover we were able to start distributing the brochure. This event was held in Trakai region, near Vilnius (Lithuania's capital).	22.10.2018	Schools, Students, Teachers	Lithuania	30

National Meetings

Partner	Activity description	Date of the event	Target Groups	Country	Number of people
Kauno technologijos universitetas	National meeting - Multiplier event was organized to present MathE project learning resources, database and tools and show to teachers how to create and use the resources engaging students into interactive Math learning process.	01.07.2021	Students, Teachers, Universities	Lithuania	22
Università degli Studi di Genova, Dipartimento di Matematica	The PLS (Piano Lauree Scientifiche) national meeting was held to discuss on the Laboratories activities carried on in the last year in the Schools by the different Italian universities. During the meeting the project was presented.	08.06.2021	Researchers, Experts, Universities	Italy	45
Kauno technologijos universitetas	Yearly meeting of the Council of Lithuanian Association of Distance and e-Learning (LieDM association) (http://liedm.net). The members/representatives from LieDM institutions (universities, colleges, schools, VET centres, informal education providers) gathered online together. Estela Daukšienė, president of LieDM Association, presented LieDM activities developed during a year and also underlined information about projects where LieDM Association takes part as partner or associate partner. Project MathE was presented and also the fact that LieDM Association is associate partner of it. Information about project (including the link to its website) is provided online in LieDM website:	18.03.2021	Researchers, Schools, Teachers, Experts, Universities, Association	Lithuania	37

Università degli Studi di Genova, Dipartimento di Matematica	Meeting of the PLS (Piano Lauree Scientifiche) group consisting of University and School teachers of secondary school of first grade. The project was presented to the teachers.	27.11.2020	Researchers, Teachers	Italy	38
Università degli Studi di Genova, Dipartimento di Matematica	Meeting with teachers and school Directors involved in the European Project SMILD. The materials of Math-E have been presented.	20.11.2020	Researchers, Teachers	Italy	12
Università degli Studi di Genova, Dipartimento di Matematica	This is the first meeting of the Scientific Group DIGIMATH https://umi.dm.unibo.it/gruppi-umi-2/gruppo-digimath/ . This is one of the scientific group of UMI (Italiana Mathematical Union). During the meeting the project MathE was presented.	23.10.2020	Researchers, Universities	Italy	32
Università degli Studi di Genova, Dipartimento di Matematica	A meeting organised every year by the Department of Mathematics for School teachers of high schools from Liguria and Piemonte. This was organised online. We present all the activities organised by the Department for teachers and high school students	22.10.2020	Teachers	Italy	27
Instituto Politécnico de Bragança	Meeting with high-school students in order to present them the MathE platform and to inform them about the possibility of using some of the resources (for instance 'Fundamental Mathematics') with their final year (12th) students.	26.02.2020	Schools, Students, Teachers	Portugal	6
Università degli Studi di Genova, Dipartimento di Matematica	This was the final workshop of the Piano lauree Scientifiche, a project based on activities about didactics of Science http://pls.dibris.unige.it/?p=113 . The event was organised together with the Departments of Chemistry, Physics, Biology and Geology. It was interdisciplinary and involved schools of all the different education levels.	14.02.2020	Researchers, Schools, Teachers, Experts	Italy	120
Instituto Politécnico de Bragança	Meeting with the librarian of Agrupamento de Escolas Martim de Freitas.	21.01.2020	Schools, Students, Teachers	Portugal	450
Gheorghe Asachi Technical University of Iasi	Meeting with librarians of the "Gheorghe Asachi" Technical University of Iasi	15.01.2020	Researchers, Students, Teachers	Romania	250
Università degli Studi di Genova, Dipartimento di Matematica	A meeting organised by the Department of Mathematics for School teachers of high schools from Liguria and Piemonte, to present all the activities organised by the Department for teachers and high school students	10.10.2019	Schools, Teachers	Italy	42
Kauno technologijos universitetas	Erasmus+ project Mathe was presented highlighting its goals and achieved results to the board of Lithuanian Association of Distance and e-Learning (LieDM association).	27.09.2019	Researchers, Schools, Teachers, Experts, Universities	Lithuania	15
Fundatia EuroEd	Informal dissemination of all Euroed projects in implementation with the meeting participants.	18.09.2019	Schools, Students, Teachers, Experts	Romania	30
Gheorghe Asachi Technical University of Iasi	Dissemination of the development of MathE project to professors from the Department of Mathematics and Informatics of TUIasi.	13.09.2019	Teachers	Romania	19

Project Number: 2018-1-PT01-KA203-047361

Instituto Politécnico de Bragança	Meeting with 5 secondary school teachers.	27.06.2019	Teachers	Portugal	5
Instituto Politécnico de Bragança	Meeting with students to present MathE and ask for their cooperation in testing the platform and sharing the project with their peers.	13.05.2019	Students	Portugal	25
Gheorghe Asachi Technical University of Iasi	Traian Lalescu National Contest for University Students 2019. Informal dissemination of all TUIasi projects in implementation with the meeting participants.	09.05.2019	General Public, Researchers, Students, Teachers, Experts, Universities	Romania	133
Gheorghe Asachi Technical University of Iasi	Meeting with the Math professors and students at the Math Gala: https://www.facebook.com/pg/math.uaic/photos/?tab=album&album_id=1216366428531872&ref=page_internal Informal dissemination of MathE projects in implementation to the meeting participants.	17.04.2019	General Public, Schools, Students, Teachers, Universities	Romania	150
Limerick Institute of Technology	Meeting of Limerick Festival of Science Committee	29.03.2019	Researchers, Universities	Ireland	4
Gheorghe Asachi Technical University of Iasi	Meeting with the Math professors from the Department of Mathematics and Informatics of TUIasi. Informal dissemination of the implementation of MathE project to the meeting participants.	20.02.2019	Teachers	Romania	19
Kauno technologijos universitetas	Seminar "Creative Methods and Techniques for Teaching Mathematics and Natural Sciences" for the teachers of mathematics, biology and physics from the schools participating in the project GoScience was organized. During the meeting also lecturers from KTU presented MathE project aims, activities, achieved results and planned outcomes.	18.02.2019	Schools, Universities	Lithuania	13
Università degli Studi di Genova, Dipartimento di Matematica	This event is the XXXVI Seminario Nazionale di ricerca in didattica della matematica "Giovanni Prodi", a seminar focusing on Math Education, in particular "Lesson Study (in Matematica e oltre) e Formazione degli insegnanti" ("Lesson Study (in Mathematics and beyond) and Teacher Training"). During the seminar Francesca Morselli and Elisabetta Robotti presented the MathE project. The brochure of the project has been distributed to the participants and the project contents discussed and shared.	24.01.2019	Researchers, Teachers, Experts	Italy	140
Gheorghe Asachi Technical University of Iasi	Meeting with the Math professors from the Department of Mathematics and Informatics of TUIasi.	16.11.2018	Teachers	Romania	19
Gheorghe Asachi Technical University of Iasi	Opening Ceremony of the Technical University of Iasi at Electronics, Telecommunications and Information Technology Faculty. Presentation of the current project at the opening ceremony.	01.10.2018	Researchers, Students, Teachers, Experts	Romania	150
Gheorghe Asachi Technical University of Iasi	Meeting with the Math professors from the department of mathematics and informatics at TUIasi. The objectives of the project have been presented to the members of the department.	26.09.2018	Researchers, Teachers, Experts	Romania	19

Transnational Meetings

Partner	Activity description	Date of the event	Target Groups	Country	Number of people
Instituto Politécnico de Bragança	Meeting with teachers of KTU and Vice-Dean of Faculty of Mathematics and Natural Sciences.	27.07.2021	Researchers, Students, Teachers	Lithuania	100
Università degli Studi di Genova, Dipartimento di Matematica	The 26th International Conference on Applications of Computer Algebra (ACA 2021) was held Online. Many researchers attended it, in particular in the session S1 Emanuela de negri gave a talk, and had the occasion to present the Project to the participants to that session.	23.07.2021	Researchers, Experts, Universities	Greece	35
Pixel	During the transnational meeting of the CAVE project, held online on 19-20/04/2021, Elisabetta Delle Donne presented Pixel activities and, among these, the MathE project	19.04.2021	General Public, Schools, Universities, Association		17
Pixel	During the transnational meeting of the QuILL project, held online on 18/02/2021, Elisabetta Delle Donne presented Pixel activities and, among these, the name of the project project	23.03.2021	Public Bodies, Training Agencies, Universities, Association		28
Fundatia EuroEd	Increa+ Kick-Off Meeting. MathE project was presented along with it's aim and objectives.	22.03.2021	Enterprises, Researchers, Training Agencies, Schools, Teachers, Universities, Association		
Instituto Politécnico de Bragança	Live meeting followed by online presentation (it was during lockdown) with teachers from the Department of Mathematics of the Instituto Universitário de Matematica Aplicada (IUMA), University of Zaragoza. The lecture was recorded and made available to all interested researchers, with no time limit.	10.03.2021	Researchers, Teachers	Spain	45
Fundatia EuroEd	BiMo Kick-off Online Meeting. MathE project was presented along with it's aim and objectives.	04.03.2021	Researchers, Training Agencies, Schools, Experts, Universities, Association		17
Kauno technologijos universitetas	During transnational kick-off meeting of Erasmus+ project "BIMO: BILINGUALISM IN MONOLINGUAL CONTEXTS", project MathE was presented to the meeting participants, promoting digital educational resources on the project website.	04.03.2021	Schools, Teachers, Universities		20
Pixel	During the transnational meeting of the BiMo project, held online on 18/02/2021, Elisabetta Delle Donne presented Pixel activities and, among these, the MathE project.	04.03.2021	Public Bodies, Training Agencies, Universities, Association		15
Fundatia EuroEd	Schools Go Green Online Meeting. MathE project was presented along with it's aim and objectives.	25.02.2021	Researchers, Schools, Teachers, Experts, Universities, Association		10
Kauno technologijos universitetas	During transnational kick-off meeting of project Erasmus+ project "VRSciT: VR Science Tour", project MathE was presented to participants, indicating the goals, objectives, achieved results,	18.02.2021	Researchers, Schools, Universities		29

Outcomes of the dissemination activity

The dissemination activity resulted in the organization of 334 separate events presented to 11 different typologies of target groups. The amount of people reached for each event depends on the type of event considered. It goes from 1 to 20 people for what concerns meetings and training seminars, up to several hundreds or thousands when considering conferences or publications on magazines and websites.

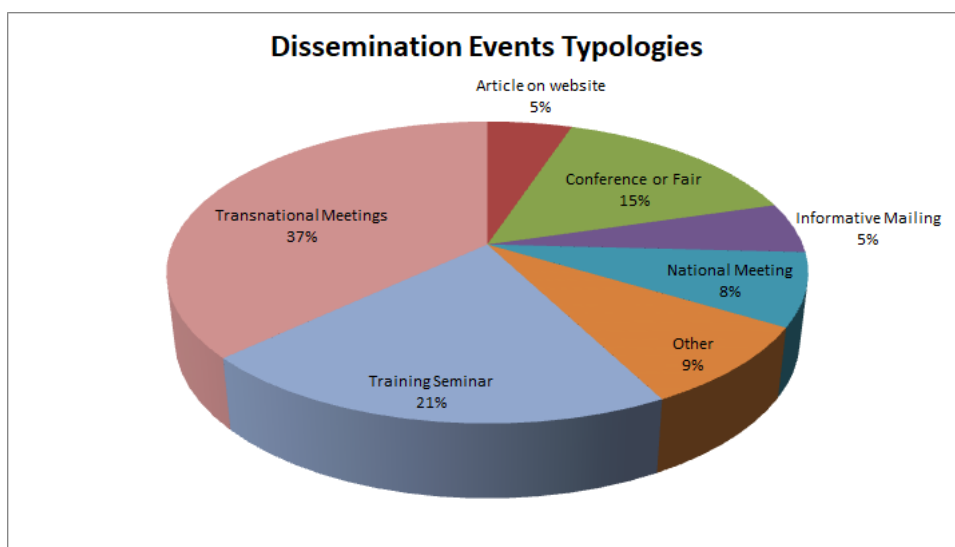

Around 60 000 individuals are estimated to have been informed about the MathE project achievements.

The graph below provides the quantitative reference of the people informed through the different mean of communication used.

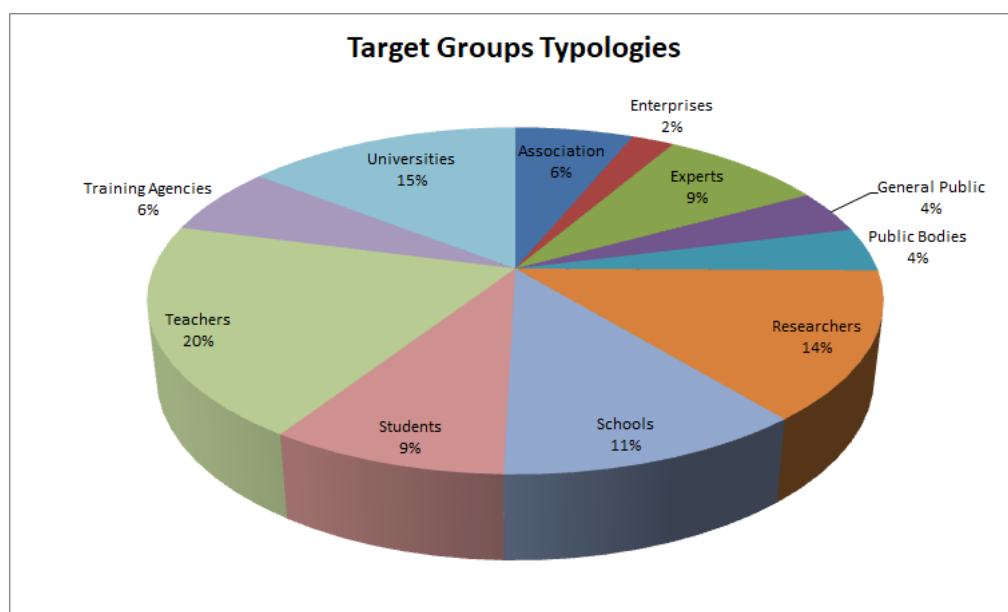

Project Number: 2018-1-PT01-KA203-047361

The 334 different dissemination events organized are: Article on website (5%), Conference or Fair (15%), Informative Mailing (5%), National Meeting (8%), Other (9%), Training Seminar (21%) and Transnational Meetings (37%).

The groups contacted by the dissemination events carried out are: Association (6%), Enterprises (2%), Experts (9%), General Public (4%), Public Bodies (4%), Researchers (14%), Schools (11%), Students (9%), Teachers (20%), Training Agencies (6%) and Universities (15%).

Project Number: 2018-1-PT01-KA203-047361

Evaluation of dissemination

The dissemination activities carried out are estimated as satisfactory. A large number of representatives of the target groups were reached. Several contacts were made as a consequence of the dissemination events organized.

The project partners made direct contacts with organisations and institutions interested in the topics of the MathE project. As a result of this activity, 49 articles about the project were published reporting the project's results and 49 direct links to the MathE portal were made available. The list of web sites that made direct links to the MathE portal is available at https://mathe.pixel-online.org/press_review.php.

The dissemination actions carried out were registered by the project partners on the specific form which was published on the project website. Please see <https://mathe.pixel-online.org/MNG-diss.php>.

Therefore all partners were able to access the information about the dissemination events organized by the others and draw ideas from them. The project's partners could, therefore, learn from each other, sharing dissemination practices according to their impact and effectiveness.

The dissemination activities carried out are estimated very satisfactory. A large number of representatives of the target groups were reached. A key point about the advantages of the transnational dimension of the project and the good number of partners and countries involved is the capacity of the project to reach a significant number of direct target groups. Indeed all the dissemination events have captured a lot of attention, giving visibility both to the MathE project and to its international spirit. The total amount of people reached through these different events is considerable and consistent with the typology of people that the team consider being its target groups. Furthermore, the typology of events was wide; indeed the events have been both national and international and have been focused on different topics relevant for the project, such as integration, social inclusion, prevention of early school leaving, strengthening of teachers competences.

Best- Practice Examples of Dissemination

In **IRELAND** the best practice examples of dissemination were identified as follows:

Limerick Institute of Technology:

On February 7th, 2019, an information email was sent to students and staff in Limerick Institute of Technology to encourage them to register for the project. The information was also delivered verbally to approximately 125 students. This was at an early stage of the project but ultimately 63 students and 11 lecturers registered on the portal. The feedback received from these registered people is largely favourable. The hope is that the lecturers will expand their use of the portal to give a legacy effect. With such a project it is useful to be able to communicate the information about the project outputs face to face.

Dissemination of the project was also carried out via Facebook. This involved posting throughout the project lifetime on the MathE Facebook page, but also on the Limerick Institute of Technology-linked Facebook pages. For example, two posts on May 9th, 2019, reached over 500 people. These include people from outside the college who may not have received information about the project otherwise. The use of virtual dissemination has been increasingly important since March 2020 when we have had to carry out the majority of our work on-line. This type of dissemination via channels like Facebook and Twitter will continue.

In **ITALY** the best practice examples of dissemination were identified as follows:

Event Stage al DIMA 2021 - #cosafaunmatematico:

The Department of Mathematics hosts annual orientation events in which what Maths really is and what Mathematician are presented. During the event Stage al DIMA 2021 - #cosafaunmatematico, students of the last two years of the High School participated to 7 meeting in the period between 29th January 2021 and 12nd March 2021.

Due to the COVID19 pandemic, it was not held in the Department, located in the centre of Genoa, but online. The events also featured guest speakers and a university student panel where participants appear and answer questions from the audience. The orientation event has been targeted at a wide audience ranging from school students, teachers, parents and more.

The stage is aimed at students in their final years of high school who are undecided about their choice of university and are considering enrolling in a course in Mathematics. The main aim of these activities is to introduce students to different aspects of mathematics, highlighting how "doing mathematics" can be fun, stimulating, and useful in application, while certainly being challenging.

105 school students joined the orientation events.

The existence of the MATHE Platform has been shared with the students and the MATHE project objectives and results are fully presented. Several questions were asked by students and teachers from the schools, showing great interest in the MATHE project and its results. The event can be considered a best practice because it reached a considerable number of students who can in turn take the knowledge of the project to their schools ensuring the expected multiplier effect.

Project Number: 2018-1-PT01-KA203-047361

In **LITHUANIA** the best practice examples of dissemination were identified as follows:

On the 1st of June, 2021, a video conference “Mathe – project for you and your students” was organized by lecturers who were directly involved into MathE project activities. Event gathered participants from Kaunas University of Technology, Faculty of Mathematics and Natural Sciences. 72 staff members attended online event: managers, administrators, heads of departments, lecturers, associate professors, professors, therefore it was a great chance to present the project and to share what was done during the project, as well to share the insights, good practices, the way we worked, advantages of international cooperation and to get the feedback from participants after presentation. Presentations and a real-test showing how the results of the project work received a lot of attention, participants had a lot of questions, were involved in discussions, interested in results. Especially lecturers who have lectures for Erasmus students or foreigners and lecture in English saw all the tools as additional tools which can extend and improve their lectures. This was the final event of the project which was organized in local (Faculty) level, as the project is almost at the end, as well all the results are produced. As well it was like a preparation for bigger event which will be organized at the beginning of July, to present the project for wider auditorium, lecturers, teachers, researcher related to Math and who are from various higher education institutions. After this event we got the suggestions and contacts to share the results with other higher education institutions, to contact Lietuvos kolegijų matematikos dėstytojų asociacija (Lithuanian College Mathematics Teachers Association) who joins professionals in Math. If not the covid-19 situation we wouldn't gather so many participants from one institution (Faculty) face to face where we could present the project so in detailed, therefore we are happy that this time we had such opportunity and the project is widely known in the Faculty and gained good feedback, as well results will be used by good number of lecturers

In **PORTUGAL** the best practice examples of dissemination were identified as follows:

Transnational meeting with the Department of Mathematics of the University of Zaragoza:

The best dissemination event carried out by Portugal – Polytechnic Institute of Bragança (IPB) is the organisation of a transnational meeting with the Department of Mathematics of the University of Zaragoza (IUMA - Instituto Universitario de Matemática Aplicada) whose target were 25 teachers/researchers of the Department plus all other teachers to whom the recording of the meeting was made available.

The meeting (and associated workshop) had a duration of 8 hours (10 people in the room + 15 people through Zoom) and was held in Zaragoza, on March 18, 2021.

The main goal of the session was to provide a forum of discussion among different perceptions about the utility of a platform like MathE's, as well as to give a boost in moving teachers to develop and redefine their pedagogical strategies by using MathE's features. Analysis, case discussion and reflection among peers has shown to be quite enlightening in spite of the constraints imposed by the pandemic (that led to most of the attendants participating through Zoom).

The dynamics that was created among the elements of the group contributed to increase and improve the collaboration of researchers and teachers and the feedback that was received from the participants indicates that the possibility of a meeting forum like this (that MathE's online forum naturally extends) goes towards the needs and desires of teachers that sometimes do not know how to engage their students and help them improve their outcomes. The meeting was considered an important opportunity to brainstorm, reflect together and eventually create new dynamics to address the needs of the students relying on the features that MathE offers.

Co-funded by the
Erasmus+ Programme
of the European Union

Project Number: 2018-1-PT01-KA203-047361

The direct impact of the event was translated in the registration of 6 new lecturers (from the attendants of the meeting) in the MathE platform, which was considered a successful result by the Portuguese team.

In **ROMANIA** the best practice examples of dissemination were identified as follows:

Promotional TV-show on BZI TV:

The best dissemination event carried out in Romania by the Gheorghe Asachi Technical University of Iasi is the interview held at the local TV show channel – BZI TV (Good Day Iasi TV). The interview was on 17th of February 2020. For 1 hour interview, under the topic of what it means to train young people in an area that offers spectacular opportunities in professional development, interesting and new projects of the Technical University, the representative of the TUIASI University, Marcel Roman, as manager project of the MathE project, discussed about the project aims, the opportunities the project offers, the results developed out of which the lecturers and the students from the Technical University can take advantage to. Beside the discussions on the project and the directions to the project website, with the specific results the project can offer, in the settings of the TV show, the emblem of the project has been displayed, this way increasing the visibility and raising the impact of the project.

The show has been presented also live, but was also published on YouTube channel and on Facebook. On Facebook, the TV show had 17000 visualisation and 157 appreciations. This TV show is addressing public at large, but with specific target to the education and social sector at local level.

This event can be considered as an example of best practice, due to the visibility these kind of actions can have; publicity on TV and on 2 of the most important online social media channels – YouTube and Facebook. In the same time, this type of dissemination action can be an example of best practice, due to the structure the project is promoted; as a TV show, the project MathE has been placed in the local contexts, identifying the needs of the students and presenting to the public, how an European project can bring an impact and can improve and add benefits to the target group for educational development.

The interview can be accessed at this link:
